

Krithik US

MERN Stack & Backend Developer

✉ krithikus2004@gmail.com ☎ 91+ 8618570153 📍 Bengaluru 🔗 LinkedIn 🌐 GitHub 🌐 Portfolio

Profile Summary

MERN stack developer focused on backend and API development using Node.js, Express, and MongoDB, with React for building and integrating frontend interfaces. Built projects including a multi-user blogging platform, a URL safety scanner using external APIs, and an AI-assisted farming system. Worked on authentication, data handling, and end-to-end integration between frontend and backend. Looking for an entry-level role to contribute to real-world systems and continue improving as a developer.

Technical Skills

- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication, Middleware
- **Frontend:** React.js, JavaScript (ES6+), Bootstrap V5, HTML5
- **Database:** MongoDB (Mongoose)
- **Testing & Tools:** Postman, Insomnia, Git, GitHub
- **Deployment & DevOps:** Render, Netlify, Cloudinary, CI/CD, Environment Configuration
- **Other:** Python, Flask, Machine Learning (scikit-learn, Model Deployment)

Internship Experience

Hope Foundation

15/01/2025 – 11/02/2025
Bengaluru

AI and Python Intern

- Worked on an AI-powered Farming Web Service, leveraging Machine Learning and Python for agricultural insights.
- Developed an ML-based Crop Recommendation System to suggest optimal crops based on soil properties, weather, conditions, and location.
- Integrated OpenWeatherMap API for real-time weather forecasts, assisting farmers in planning irrigation and harvesting.
- Designed an interactive market price trends dashboard using Flask, React.js, and Chart.js, enabling farmers to analyze historical crop prices.
- Developed practical experience in AI model deployment, API integration, and frontend-backend communication.
- Certified by Hope Foundation - [View Certificate](#)

Projects

Admin-Managed Blogging Platform

- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Firebase
- **Project URL:** [Click Here](#)
- Built a responsive multi-user blogging platform with role-based admin control and multi-authentication support including Firebase Auth, Google OAuth, and custom JWT-based login.
- Designed and implemented REST APIs using Node.js & Express, integrated with MongoDB for scalable data storage.
- Implemented secure token-based authentication and protected API routes using middleware to ensure role-based access control.
- Added CRUD operations, pagination, and search functionality to improve usability and performance.

URL Safety Scanner

- **Tech Stack:** React.js, FastAPI(Python), MongoDB, VirusTotal API, Cloudinary, Tailwind CSS
- **Project URL:** [Click Here](#)
- Integrated VirusTotal API to analyze URLs for phishing and malware, returning structured threat data in real time
- Designed backend workflow to process scan requests, trigger analysis, and persist results in MongoDB
- Developed custom crawler to extract website metadata and capture screenshots, stored via Cloudinary
- Built REST APIs for scan execution, history tracking, and result retrieval, deployed with reliable backend connectivity

Education

- Bachelor of Computer Application
- East Point Group of Institutions
- 2022 - 2025
