

Krithik US

MERN Stack & Backend Developer

✉ krithikus2004@gmail.com ☎ 91+ 8618570153 📍 Bengaluru 🔗 LinkedIn 🐙 GitHub 🌐 Portfolio

Profile Summary

Backend-focused MERN Developer with hands-on experience designing and deploying secure, scalable REST APIs and full-stack applications. Experienced in MongoDB query optimization, role-based authentication, and end-to-end deployment workflows. Built and deployed production-like projects including an admin-managed blogging platform and an AI-powered farming assistant. Passionate about backend architecture, performance optimization, and building reliable web services. Seeking an entry-level backend role to contribute and grow in real-world systems.

Technical Skills

- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication, Middleware
- **Frontend:** React.js, JavaScript (ES6+), Bootstrap V5, HTML5
- **Database:** MongoDB (Mongoose)
- **Testing & Tools:** Postman, Insomnia, Git, GitHub
- **Deployment & DevOps:** Render, Netlify, Cloudinary, CI/CD, Environment Configuration
- **Other:** Python, Flask, Machine Learning (scikit-learn, Model Deployment)

Internship Experience

Hope Foundation

15/01/2025 – 11/02/2025
Bengaluru

AI and Python Intern

- Worked on an AI-powered Farming Web Service, leveraging Machine Learning and Python for agricultural insights.
- Developed an ML-based Crop Recommendation System to suggest optimal crops based on soil properties, weather, conditions, and location.
- Integrated OpenWeatherMap API for real-time weather forecasts, assisting farmers in planning irrigation and harvesting.
- Designed an interactive market price trends dashboard using Flask, React.js, and Chart.js, enabling farmers to analyze historical crop prices.
- Developed practical experience in AI model deployment, API integration, and frontend-backend communication.
- Certified by Hope Foundation - [View Certificate](#)

Projects

Admin-Managed Blogging Platform

- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Firebase
- **Project URL:** [Click Here](#)
- Built a responsive multi-user blogging platform with role-based admin control and multi-authentication support including Firebase Auth, Google OAuth, and custom JWT-based login.
- Designed and implemented REST APIs using Node.js & Express, integrated with MongoDB for scalable data storage.
- Implemented secure token-based authentication and protected API routes using middleware to ensure role-based access control.
- Added CRUD operations, pagination, and search functionality to improve usability and performance.
- Deployed on Render, ensuring stable backend connectivity and smooth app performance across devices.

Farming Web Service Using AI

- **Tech Stack:** Flask, React.js, Python (scikit-learn), Chart.js, OpenWeatherMap API
- **Project URL:** [Click Here](#)
- Developed an AI-powered farming assistant with React frontend and Flask-based ML backend.
- Trained and deployed scikit-learn models for crop recommendation based on soil and weather data.
- Integrated OpenWeatherMap API and built interactive dashboards using React and Chart.js.
- Designed REST endpoints for real-time predictions and frontend integration.

Education

- Bachelor of Computer Application
- East Point Group of Institutions
- 2022 - 2025
